SKILLS AND QUALIFICATIONS

- **Operating Systems** | Windows • Linux • macOS
- **Programming** | Python • Java • C++ • SQL • NoSQL • JavaScript • HTML • CSS
- **Frameworks/Libraries** | React • NumPy • PyTorch • Pandas • Matplotlib • TensorFlow • Scikit-learn
- **Applications** | SAP • Power BI • Docker • VS Code • Word • Excel • PowerPoint • Access • MS Project
- **Other** | Agile • Scrum • DevOps • Git • Quality Assurance • Dashboarding • Data modeling

EDUCATION

Master of Engineering - Information Systems Security Co-op **2026 – 2028 (Expected)**
Concordia University • Montreal, Quebec

- Designing, implementing, and managing secure information systems through applied coursework and research, with exposure to areas such as cyber forensics, cryptography, and vulnerability analysis.

Bachelor of Computer Science - Computer Science **2023 – 2025**
Concordia University • Montreal, Quebec

- Relevant Courses: Data Structures & Algorithms, Operating Systems, Artificial Intelligence
- GPA: 3.57

WORK EXPERIENCE

Senior Cash Accountant **Summer 2024**
Videotron • Montreal, Quebec

- Reduced reimbursement delays from 17 weeks to 7 days by standardizing workflows and improving follow-ups with supervisors or colleagues on pending requests.
- Protected sensitive client information by following internal privacy procedures, limiting access to required data, and documenting cases without exposing confidential details.
- Managed high-value transaction cases in the SAP application, validating information and keeping client statuses up-to-date.
- Trained new interns/employees and shortened onboarding by coaching through real cases and creating detailed step-by-step instruction documents for the team.

Senior Cash Desk Attendant **Summer 2022 / 2023**
Videotron • Montreal, Quebec

- Processed 100+ transactions per day, while also maintaining accuracy by following guidelines.
- Cut response and processing time from 3+ weeks to 1 day for account-status updates and bank transactions requests by improving request prioritization.
- Communicated clearly with bank representatives and colleagues by documenting actions taken, tracking task daily/weekly progress and providing updates to support task handoffs.

PROJECTS

Log Analyzer **Cybersecurity**
Python, Pandas, Regex, Matplotlib **2026**

- Used sample authentication and web-server logs to flag suspicious patterns such as repeated failed logins and brute-force attempts, summarizing results with dashboarding.

Brain Tumor Classifier **ML / Computer Vision**
Python, NumPy, Pandas, Matplotlib, Seaborn **2025**

- Classified MRI images as tumor/non-tumor by building an end-to-end pipeline (preprocessing, training, evaluation) and validating performance with metrics and visualizations (confusion matrices, graphs).

OpenGL Solar System **Computer Graphics**
C++, OpenGL, GLFW, GLEW, GLM **2025**

- Built an interactive 3D solar system with a hierarchical scene graph (planets, moons, rings), texture mapping, skybox, animated orbits and lighting/shader pipeline.

Snappy - ConUHacks IX Sun Life Challenge **Finance / Fullstack**
React, TypeScript, Vite, Go **2025**

- Prototyped a financial dashboard with insights and recommendation features during a 24-hour hackathon.
